

ASSIGNMENT

Component Hunt

Q) Break a popular website into components and sketch the structure.

Component Hunt: YouTube Structure

1. Masthead (Header Component)

- Contains the **YouTube logo**, **search bar**, and **action icons** (create, notifications, profile).
- Provides quick access to search and account features.

2. Guide Component (Sidebar Navigation)

- Includes navigation items such as **Home**, **Shorts**, **Subscriptions**, **Library**, and **History**.
- Helps users easily navigate between different sections.

3. Main Content Component

- Displays the **video grid layout** where multiple videos are shown.

4. Video Grid Component

- Organizes videos in a **grid format**.

- Contains multiple **Video Card components**.

5. **Video Card Component (Reusable Component)**

- Shows **video thumbnail, duration overlay, channel avatar, title, channel name, and metadata (views, upload time)**.
- This component is reused for displaying many videos.

6. **Search Results Page Components**

- Shows **video cards and channel cards** when users search for content.

7. **Video Watch Page Components**

- **Video Player Component** – plays the selected video.
- **Video Details Component** – shows description, views, and video information.
- **Channel Info Component** – displays channel details and subscribe button.
- **Related Videos Component** – suggests similar videos.
- **Comments Section Component** – shows user comments and interactions.

8. **Reusable Components Concept**

- Components like **Video Card** are reused multiple times to maintain consistency and improve development efficiency.
